

azbil Control Motor ECM3000F213C

?????????

Control Motor Model ECM3000F213C

Features

- Robust die-cast aluminum case

Long-life parts are used in the motor, including the feedback potentiometer and bearings.

- Input can be selected from 3 types (depending on the model)

Relay contact, 4–20 mA DC, or potentiometer input.

Models with 90° rotation are equipped with a pointer showing the amount of rotation and labels for indicating the direction of rotation. As an option, the motor can be equipped with four auxiliary switches.

- Excellent environmental resistance equivalent to IP54 waterproofing
- Mounting bracket (standard accessory) for replacement of our previous motor
- Selection of 90° or 160° rotation model to suit the application

- Output torque of 12.5 N·m
